

## Welcome to the Ninth Annual Ringstead Bull Sale!

### Welcome, Friends, to Ringstead's Ninth Annual Bull Sale!

#### Ringstead Ranch

**Rick & Deb Cones**  
**Ph: (403) 931-3276**

Box 31,  
Millarville, AB T0L 1K0

We would like to express our most sincere appreciation to our very dedicated staff:

**Grant Mills - 306-365-8086**

**Tammy Krieger - 306-360-7705**

**Duane Weber - 306-365-7132**

**Ed Wurtz - 403-312-1373**

Welcome to our 9th Annual Bull Sale and the 18th year we have been breeding Angus cattle. This year marks another first for us as it is the first year we will be offering a group of coming 2 year old Simmental bulls. All are sons of SSP Big Red, a very impressive sire from Yellow Rose Cattle Company of Didsbury Alberta.

Things seem to be settling a bit in the cattle industry. As I write this, preliminary calf prices look better and fat prices are remaining firm despite the escalating Canadian dollar. The demand for beef south of the border seems to be increasing, a good thing for all of us.

Like many of you, it has been hard for us to break even on our cattle over the last few years and like many of you, **we have had to cull hard**. As a result, what we have left are a group of one of the **best footed, best uddered Angus cows** you will find anywhere. Our calf crop gets better and better each year and with all the grass out there, **this year they are simply outstanding**.

**A new venture we have been working on for the last 3 years, is coming 2 year old Simmental bulls**. The Simmental cow herd was put together 15 years ago by Grant Mills and his brother Craig and has been leased to Muirhead Cattle Co. since Grant has been working for us. This is an established herd that has produced a great set of bulls for several years into N.E. Saskatchewan.

We continue to stand behind our cattle and endeavour to provide the best service we can to you, Our Customer. **We guarantee these bulls 100% and if you are not happy with your purchase, we will undertake to rectify the situation to your satisfaction.**

When you look at the sires of these bulls, you will see several that are 6 to 8 years old. All of these older bulls pasture bred again this year. That spells **longevity**, resulting from **good feet** and **good structure** and it makes it easy for us to put this guarantee on our bulls.

The bulls are at home at our Cayley facility. **Like last year, this will be a video sale and the bulls will be on display on sale day. For your convenience, they will also be available for viewing prior to sale day, just give us a call.** Lunch will be served starting at 11:30 so even if you don't need a bull, feel free to drop by before the sale for lunch or after the sale for some early Christmas Cheer!

**Deb, Grant and I look forward to seeing you on December 1st at the ranch in Cayley.**

Rick & Deb Cones

### Map to the Ranch / Sale Site

**December 1, 2010**  
**1:00 p.m. at the Ranch!!**

**Sale Location: Ringstead Ranch**  
at Cayley Alberta. We are 10 km south of High River (taken from the Hwy #23 overpass) and 9.8 km west on Highway #540.

**The Sale Date is Wednesday -  
December 1, 2010.**

# 9<sup>th</sup> Annual Ringstead Ranch Red & Black Angus Bull Sale

**“Coming Two’s”!**

- 43 Red Angus • 38 Black Angus
- NEW THIS YEAR - 8 Red & 3 Black Simmentals

**WE ARE HERE TO HELP YOU!**

### ASSISTANCE PROGRAMS:

1. A flat \$200 per cull bull will be given to you in the form of a “Sale Credit” towards the purchase of one new bull in this 2010 Ringstead Bull Sale. Simply bring your auction market receipt to the sale and receive \$200 off the purchase price of your bull or mail us a receipt prior to delivery of your new bull and we will mail you a cheque for \$200. Not to be used in conjunction with any other offer.
2. If you wish, as a buyer you may pay 50% down at the sale on bulls with the balance payable on April 1, 2011.
3. Ringstead will winter all bulls free of charge until May 1, 2011. **We will take responsibility for the bulls until delivery - insurance is not required.** If insurance is required, it can be put on the bulls effective May 1, 2011. Please let us know at sale time if you would like this and we will arrange it after the semen test in the spring. Ringstead will provide free delivery to central points within a 600 mile radius of Calgary.

### BACK BY POPULAR DEMAND!!

4. **VOLUME DISCOUNT!!** 5% off the 3rd & 4th bulls and 10% off any bulls over 5.

For More Information, Contact:

**VIDEO AVAILABLE!!**

**A VIDEO OF THE SALE BULLS WILL BE AVAILABLE  
THE 2ND WEEK OF NOVEMBER - PLEASE CONTACT  
RICK OR GRANT FOR YOUR COPY!**

## Ringstead Breeding Program

Ringstead Ranch presently maintains a herd of around 700 purebred Red and Black Angus cows and 250 commercial cows. All of our cows have been moved to May/June caving at either our Cayley, Alberta location or our Drake, Saskatchewan, location.

At Ringstead, we are big believers in both A.I. and embryo transfer work to continue to improve the quality of our purebred herd. We A.I. a large percentage of our purebred cows each year to a small group of select sires that have

***“We A.I. a large percentage of our purebred cows each year to a small group of select sires that have proven and predictable performance. We look for sires that have been proven to pass the traits we want to enhance.”***

proven and predictable performance. We look for sires that have been proven to pass the traits we want to enhance.

For our embryo donor program, the very best purebred females are selected from our herd and are then flushed to the most powerful sires available in North America.

The resulting embryos are implanted into the commercial cows and our own Angus herd sires are

***“For our embryo donor program, the very best purebred females are selected from our herd and are then flushed to the most powerful sires available in North America.”***

used as clean up bulls.

At Ringstead we work very hard on feet and structure. We have a strict culling program and the cows are regularly evaluated.

We do not presently sell breeding females out of the herd, the best heifers go back in and the culls are taken off the bottom.

Any female that does not produce either a sale bull or a replacement heifer at least every other year is also culled.

### Additional Information on the Sale Bulls

#### - Semen Testing -

Before the sale the bulls will be palpated and measured. They will be semen tested before delivery in the spring so we can ensure you've got a good breeding bull. If you wish to take delivery immediately after the sale, we will have the bull semen tested at that time.

#### - Viewing Of Bulls -

Because this is a **VIDEO SALE**, the bulls WILL NOT be coming in the ring to sell. Therefore we encourage you to please stop by Ringstead Ranch (directions & map on inside front cover) and view the bulls any time between now and sale time where they will be available for viewing next to the sale barn.

#### **VISITORS ALWAYS WELCOME!**

- **Ringstead bulls will remain at Ringstead Ranch after the sale, free of charge, until May 1, 2011. We will take responsibility for the bulls until delivery - insurance is not required.**
- **If you haul your own bull on Sale Day, you will receive \$100 off the purchase price of the bull.**
- **If you cannot be with us in person, we invite you to take advantage of our “Sight Unseen” Satisfaction Guaranteed Purchase Option.**

**Be sure to join us after the sale for Christmas Cheer and hospitality!!**

- **Projected Sale Weight & Scrotal Circumference will be available in printed form on Sale Day**

#### - Explanation of EPD Terms -

**EPD** = Expected Progeny Differences

They are another tool used to select a bull and are predictions on how each bull rates against his own contemporary group and the rest of the breed.

- BW:** This value predicts the difference in avg. birth weight of a bull's calves compared to breed averages.
- WW:** Indicates the ability of a sire's calves to grow from birth to weaning (expressed in pounds).
- YW:** Growth from birth to yearling (expressed in pounds)
- Milk:** A reflection of the milking ability of a bull's daughters. It compares the difference in gain between birth to weaning of a bull's daughter's calves compared to the calves from daughters of other sires evaluated.
- TM:** Calculated by using 1/2 WW + Milk. Predicts weaning weight on a bull's daughter's calves.

## Sire of Lots #1 - #4

This bull was purchased out the short grass country of Southern Saskatchewan. He comes from the well known Sandy Bar program out of a great cow that has already produced four herd sires to purebred breeders.

He has developed into a nice, correct bull who is fitting in well into our breeding program.

#### Sire of Lots #5 - #9

We purchased this sire as a 3 year old out of the Triple V Dispersal at the end of 2005. He clearly had the best set of calves at the dispersal.

Now as a 8 year old bull, he has not disappointed us - his daughters are taking their place in the herd and his sons are easy fleshing and well put together.

He is a son of the immortal Sitz Alliance 6595, the bull that truly "did nothing wrong".

## Sire of Lots #11 - #19

This bull came as the third string sire when we purchased the Black Angus herd of Dennis and Shelley Erikson of Get-A-Long Stock Farms. It took us a year or so to recognize his potential, however he quickly moved into a starting position when we saw his first calf crops.

He sires moderate, correct, well muscled calves that can be often used on both heifers and cows.

## POINTS TO CONSIDER -

- Our bulls are never pushed to get big 205 Day or 365 Day Weights. We believe this results in a bull that will have greater longevity and will be an efficient converter of roughage.
- The bulls go through a strict culling process - first at weaning, second the following spring, and third, when they come off grass in the fall. All bulls that exhibit or develop any structural, temperament or foot issues are culled as well as bulls that cannot hold condition on a back-grounding ration, or grass over the summer.

#### Sire of Lots #20 - #22

Ownership of this bull also came with the purchase of the Black Angus herd of Dennis & Shelley Erikson of Get-A-Long Stock Farms.

31M is a guaranteed "Sleep At Night" heifer bull with probably one of the best Black cows in Western Canada for a mother. His calves might not be the biggest, but they may very well be the best. His first daughters calved in 2007, easily outperforming the rest of the Black heifers calving that year.

### Sire of Lots #23 - #32

When we purchased the Black Angus herd of Dennis & Shelley Ericson at Get-A-Long we were fortunate to acquire the walking rights to Dateline 2M who was packed full of meat & muscle and was able to squeeze 2700 pounds onto a 5.6 frame when he was in stud. Although he throws a little higher birth weight, we now have over 250 of his calves on the ground with no calving problems whatsoever. He has a powerful set of sons on test that should transmit the truly impressive carcass data that he has.

Semen available from Semex Alliance.

#### Sire of Lots #23 - #32

This bull was purchased from Stauffer Angus Ranch in 2007 in partnership with Brylor Ranch. Bryan & Sherry Mackenzie showed him to Grand Champion Angus Bull at Agribition that year. He is developing into a great breeding bull, he has lots of natural muscle, moves like a cat and has a great foot under him.

Both Stauffer and Brylor have used him in their breeding programs and Stacey's high selling bull this year was a son of his.

#### Sire of Lots #36 - #39

Luke is a well balanced bull with great muscle and above average EPD's for Growth and Milk.

Owned in partnership with Merit Cattle Co, he has consistently produced great sons for both ranches. He has a below average EPD for birth weight and his sons can be used on both cows and heifers with great success.

- nice hip

### "YOU GET WHAT YOU PAY FOR"

**When You Buy a Ringstead Bull, You Get a Lot!**

#### What do you get?

1. A coming two year old bull that can handle more cows the first year and recover from breeding quicker and with less management.
2. An older bull that has been developed and fed to maximize longevity, soundness and fertility.
3. A bull from a program that does not chase fads but, instead, emphasizes traits that affect your bottom line.
4. A warranty program that not only ensures that you will have a sound breeding bull, but motivates us to produce efficient productive cattle.
5. Free Wintering
6. Free Delivery.
7. Prompt Service
8. Cull Bull Credits
9. Volume Discounts.

**Sire of Lots #48 - #52**

We had used this bull successfully on our heifers for a number of years. For this calving year we decided to use him on some cows and were very pleased with the results. He provides light birthweights and stamps his sons with good muscle definition. His mother is the best Red cow Ringstead owns and we are currently using four other maternal half brothers in our breeding program.

### Sire of Lots #54 & #55

We purchased an interest in this bull's dam in 2006 at Red Round Up. Continuum was the bonus inside her and now, as a 3 year old, he is developing into a powerful breeding bull.

We used him sparingly the first year to try him out and these first few calves are the result. His 2010 calf crop is very impressive - powerful sons with lots of muscle and a great foot under them. We kept another maternal half brother back to use on heifers this year. It looks like Continuum's dam is going to be foundation type cow for us.

304H - Dam of Continuum 715 - Grandam of Lots #54 & #55

Power and depth of pedigree all in one. 627W's dam is the full sister to two herdsires at Ringstead Ranch, Dawson and Klondike. She already has sons working at Sweetwater Ranch and Holiday Ranch.

- powerful & rugged
- long & thick
- great feet

### POINTS TO CONSIDER -

- Our bulls are never pushed to get big 205 Day or 365 Day Weights. We believe this results in a bull that will have greater longevity and will be an efficient converter of roughage.
- The bulls go through a strict culling process - first at weaning, second the following spring, and third, when they come off grass in the fall. All bulls that exhibit or develop any structural, temperament or foot issues are culled as well as bulls that cannot hold condition on a back-grounding ration, or grass over the summer.

Red Ringstead Klondike 199R - Full Brother to Dawson 209R

### Sire of Lots #56 & #57

We flushed our great 98D cow to Yukon and produced two great full brothers in Klondike and Dawson. Half interest in Dawson was sold to McMillan Ranching of Carrievale, SK, and we have continued to use his genetics by way of A.I.

The Dawson calves have been standouts from birth at both McMillan and Ringstead showing great confirmation, structure, and growth. Like their sire, Dawson sons should be aggressive breeders with the ability to cover a lot of ground.

Ref. Sire M - Red Ringstead Kargo 107M (the "Original" Kargo!)

### Sire of Lots #60 - #68

After breeding some heifers we initially sold Kargo as a yearling to a commercial breeder. The next year when those heifers calved, it quickly became apparent that we better get him back and into our breeding program. Now an 8 yr old bull, he is still pasture breeding and we are also using him in both our A.I. & E.T. programs. A cornerstone of our program, he consistently produces correct, easy fleshing sons and daughters. He stamps his offspring and they are easy to pick out in groups of cattle.

#### Sire of Lots #69 & #70

We teamed up with Blades Angus to purchase this exciting young sire from Brylor Ranch in 2008. He has to be one of the thickest easiest fleshing bulls that you will find and he certainly seems to pass that to his sons.

He has had several sons sell well at both Brylor and Blades sales this spring and we are pleased to be able to offer the coming two year old models this fall.

## Sire of Lots #73 - #75

We jumped at the opportunity to purchase some Red Knight semen in order to get his bloodlines into our breeding program. If you want to talk about longevity here is a bull that is 16 yrs old, has been the top producing bull in several programs and is still popular. Through ET, we flushed him to some of our best cows, and are pleased to be able to present some offspring to you here. Red Knight offers good calving ease and growth, even by today's standards. His daughters are deep and correct with excellent udders and are well sought after by purebred breeders.

Mrs. Young 095, dam of Kargo 107M, has had a huge impact on the Ringstead herd and is continuing the legacy with the addition of another son to the herd bull battery this year. Her offspring and grand-offspring are always easy to identify by the shape of their head and hip, and their great hair coat. -very balanced with nice length & thickness

Mrs. Young 095

**Sire of Lot #76**

We purchased this bull of out the Bar-E-L program in 2006. We turned him out the first year with two other purebred bulls and 80 purebred cows and then DNA tested the calves that we kept. A surprisingly high percentage were from this bull.

Today, as a five year old, he is continuing to produce well. He is structurally correct with good length and depth of rib and puts these characteristics into his calves. It would be difficult to find another bull that is as wide based, long spined, and thick as Rifle.

**Sire of Lots #77 - #79**

This young sire is, again, a son of the 98D cow. We have tried him out on small select groups of cows for the past two seasons and are pleased with the results. As far as we are concerned the more 98D we can put back into our program through Rodes and his maternal brothers 72N, Dawson and Klondike, the better.

# Ringstead Simmental Program "Coming Two's"

## New This Year -

In an effort to help fulfill the bull requirements of our customers, Ringstead has purchased a small yet productive herd of Simmental cows. This herd ("Drifting M") was started 15 years ago by Grant Mills and his brother Craig. Since Grant has been working for Ringstead they have been leased to Muirhead Cattle Co near Prince Albert, SK. They are an established herd that has produced a number of good breeding bulls into northeastern Saskatchewan. We have eleven coming 2 year old Simmental bulls on offer this year and expect to more than double that for next year.

The goal is to offer a strong set of coming two year old Simmental bulls to compliment the Angus genetics that our bull customers have based their cow herds on.

Lets face it, hybrid vigor is the only free thing left in the cow/calf industry! We will be striving to offer bulls that will produce an outstanding steer calf as well as maintaining strong maternal traits to produce the best crossbred female possible.

Leased from Yellow Rose Cattle Co. "Big Red" is a powerful Red Simmental bull that has already produced high selling females for Yellow Rose, not to mention a powerful, well received set of sons. He was used on the entire Simmental herd in 2008, heifers and all. Other than one malpresentation, all calves were born unassisted and possessed great vigor at birth. Look for his sons to transmit extra length and thickness in a sound package.

2. Catalogue is available ONLINE in FULL COLOR:  
[www.ringsteadranch.com](http://www.ringsteadranch.com)  
or [coyotepub.com](http://coyotepub.com) (click on the catalogue cover)
3. ONLINE BIDDING will be available - If you wish to participate please see page 3 or page 26 for sign up information

## The Ringstead Advantage!

### Our Guarantee

When you buy a bull from Ringstead Ranch, we view it as our responsibility to make sure you have sufficient "bull power" during your breeding season. We, ourselves, have a large herd of commercial cows that are bred for mostly summer calving.

**We stand behind our product 100%** and therefore maintain a large inventory of high quality bulls for our own cows and use these bulls as well as our purebred herd bulls as backup for our customers.

If you purchase bulls from us and experience any problems whatsoever during breeding season **you can expect a suitable replacement bull on site within 24 hours of your phone call.** Unfortunately it is a fact that bulls do hurt themselves and when that has happened in the past, new customers are frequently surprised at the speed with which a replacement bull is delivered. With ranches at both Drake, Saskatchewan and Cayley, Alberta, we are within easy reach of most places in Western Canada.

Our policy is to **"Replace the bull first and ask questions later"**. After the bull has been replaced and sometimes after the breeding season has been completed, the problem bull can be properly diagnosed and a satisfactory agreement reached between us and our customer. Looking after bulls is our business and often we can help diagnose problems and nurse injured bulls back to good health.

### Ringstead Bull Development Program

Ringstead has now changed all of our cows to May/June calving. The bulls are weaned in November at 5 months of age and moved to the ranch at Cayley. Prior to weaning, they are put on creep feed for 45 days strictly as a management tool. After weaning, they are fed a back grounding ration of 1/3 pellets, 1/3 silage and 1/3 hay. The following May they are put back on grass where they stay until September when they are introduced back onto the silage/pellet ration. At this time, they are supplemented by either grass or hay. The pellets are a 14% protein screening pellet and we usually feed up to 1% of their body weight by sale time. After the sale, the silage pellet ration is slowly reduced until they are on straight hay by the end of February.

It has taken some development over the last few years to come up with this feeding program for the 2 year olds. They are never pushed to get big 205 Day or 365 Day Weights and are either out on grass or in large pens so they are ready to be turned out with cows the following spring.

The bulls go through a strict culling process several times. First at weaning in November, the obvious culls are removed. Second, in the following spring a very strict cull is done where any bulls with poor development or structure are removed. We also check testicle size at this time and any animals that do not meet the breed standards for yearlings are culled. A third cull is done in the fall when the animals come off grass. Any bull that cannot hold his condition on grass over the summer is culled. The final cull comes before the sale when the bulls are checked again for structural soundness and development. We strive to bring a balanced, sound group of breeding bulls to the sale that will work well for you and that we can be proud of.

## Results from the 8th Annual

### Ringstead Ranch Red Angus Bull Sale

December 2, 2009 - Ringstead Ranch (Cayley, AB)

Auctioneer: Brent Carey

Gross on 58 Sale Lots: \$194,100; Avg.: \$3,347

34 Red Angus Coming Two's Avg.: \$3,507

24 Black Angus Coming Two's Avg.: \$3,119

\$6,750 to Triple X Red Angus

### Map to Ringstead Ranch (Sale Site)

## Terms & Conditions

**TERMS** - The terms of the sale are cash or cheque payable at par at Cayley, AB. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released.

**BIDS** - Every animal entering the sale ring will be sold to the highest bidder. A floor price will apply to each animal consigned.

**DISPUTES** - In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

**PURCHASER'S RISK** - Each animal becomes the risk of the purchaser as soon as sold.

**ANNOUNCEMENTS** - Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time and such corrections will take precedence over the printed matter in the catalogue.

**CERTIFICATE OF REGISTRY** - A certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

### ALL BULLS SELLING -

- 1) All bulls selling will be semen tested before delivery and will have scrotal measurements posted on Sale Day with projected Sale Weights.
- 2) All bulls selling are virgin bulls
- 3) All bulls selling can be returned to Ringstead Ranch to be wintered Free of Charge until May 1st. We will take responsibility for the bulls until delivery - insurance is not required.

- OR

- 4) Haul your own bull on Sale Day and receive \$100 off the purchase price
- 5) Delivery of the bulls will begin on May 1st or pick up at the ranch

**BREEDERS GUARANTEE** - Ringstead Ranch has done everything possible to assure you, the buyer, that every bull in this sale will be a breeder; however, should a problem arise, please inform the seller so further arrangements may be made.

**ACCIDENTS** - Every precaution will be taken to protect the safety and comfort of those attending the sale. Neither the owner, auctioneer, nor any of the sale staff assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss of property.

**LIABILITY** - All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in, on or about the premises.

**VIEWING THE BULLS** - This is a VIDEO SALE. No live animals will enter the ring, therefore we encourage you to stop by Ringstead Ranch any time prior to sale time to familiarize yourself with the bulls and ask any questions you may have. The bulls will be on display next to the sale barn on Sale Day.
